

# ZerAx® AUZ tunnel jet fan

The world's most efficient fan  
now also available for tunnel ventilation

- ✓ **EN 12101-3:2015**  
certified jet fans with VSD for tunnel smoke control
- ✓ **ZerAx® Technology**  
higher thrust and lower sound level
- ✓ **Special outlet cone**  
more thrust, easier installation,  
lower sound level

## Reliable, efficient and silent

The NOVENCO ZerAx® uni-directional jet fans combine power and efficiency, delivering up to 20% more thrust with smaller size, lower installation height and reduced motor power.

## Built for reliability, engineered for safety

ZerAx tunnel jet fans are built to last, with a lifespan exceeding 20 years. They are rigorously tested and certified for smoke extraction with variable speed drives,

ensuring reliable performance even under extreme conditions. This makes ZerAx® the ideal choice for open injector applications at tunnel entrances, providing dependable safety in the event of a fire.

## Silent strength

The ZerAx jet fans feature a specially designed outlet cone that not only increases thrust but also optimizes airflow direction. This innovative design reduces noise compared to traditional air deflectors, creating a quieter, safer tunnel environment.
