

# NOVENCO® life safety systems

Certified smoke control systems for safe escape routes, tunnels and car parks

- ✓ Certified by KIWA/NCP as an Approved Smoke Control Company
- ✓ Design and installation of SHEVS and pressure differential systems
- ✓ Speed-controlled smoke fans in accordance with EN 12101-3:2015

## Reliable smoke control

As buildings grow more complex, so do the risks. In the unlikely event of fire or emergency, people must be able to evacuate safely. Reliable smoke control systems ensure escape routes remain safe and secure.

As a KIWA/NCP-accredited smoke control company, NOVENCO Building & Industry offers a complete package for the design, supply, installation, and maintenance of certified smoke control systems.

## Innovation as a core competence

NOVENCO is committed to innovation. Our ZerAx® fan is the most energy-efficient in the world. The ZerAx HT has also been tested and certified as a variable-speed smoke and heat exhaust fan, complete with the corresponding frequency converter, for high-temperature operation in accordance with the latest product standards.

With years of experience and expertise in this field, NOVENCO delivers reliable and fully customised solutions for any building.
